## Technical Skills

---

**Languages:** JavaScript, SQL Server, VB.NET, Python, C++, C#, Java, Dart, HTML, CSS

**Frameworks & Libraries:** Vue.js, Django, Flask, Pandas, ASP.NET/.NET Core, Flutter, Bootstrap, Express.js, FastAPI, Power BI, Unity

**Developer Tools:** Git, GitHub/GitLab, Azure, Azure DevOps, AWS, Docker, Postman, Node.js, VS Code, Visual Studio, Excel

## Experience

---

### Omega365 USA Inc.

**Full-Time**

*Full-Stack Developer*

*Sep 2024 – Present*

- Drive full-stack development as part of a 3-person team building Chevron's enterprise asset management platform, supporting millions of engineering records across global business units.
- Spearheaded cross-functional migration of Chevron asset data from deprecated platforms to modern systems, improving performance and driving a **70%+** increase in user adoption.
- Built an automated data pipeline in JavaScript, VB.NET, and SQL Server to pre-process and batch ingest 6 million metadata records on a 24-hour recurring schedule.
- Owned full feature delivery end-to-end across the Agile lifecycle — from requirements and architecture through backend, UI, testing, and deployment — using JavaScript, VB.NET, C#, SQL Server, HTML, and CSS.

### Omega365 USA Inc.

**Part-Time**

*Software Developer Intern*

*Jul 2024 – Sep 2024*

- Built a full-stack web application in JavaScript, SQL Server, HTML, and CSS that enhanced University of Houston academic maps with expanded, student-facing course detail.
- Architected a full RDBMS university management system in SQL Server, encompassing course creation, student records, exam administration, grading, and secure role-based authentication.
- Delivered an inventory and order tracking application on the Omega365 framework with role-based access control and custom PDF purchase order reporting via WinForms.

### R's Fast Electric

**Contract**

*Software Engineer*

*Dec 2023 – Mar 2024*

- Developed a responsive business web application using C#, ASP.NET, Entity Framework, SQL Server (MSSQL), JavaScript, HTML, and CSS , supporting invoicing, expense tracking, inventory management, and job scheduling.
- Architected and deployed the application on Microsoft Azure, improving website usability by **30%**.
- Designed and implemented **5+** application modules and corresponding database features, streamlining daily business operations and reducing manual administrative work.

### Esync Technologies

**Remote**

*Software Engineer Intern*

*Aug 2023 – Nov 2023*

- Built a full-stack Flutter mobile application surfacing real-time unemployment and job market trend data to end users.
- Integrated NewsAPI for live data ingestion, increasing data accuracy by **20%** and improving overall reliability.
- Redesigned the front-end UI from the ground up, driving a **40%** increase in user engagement.
- Optimized Firebase backend services for data handling efficiency, reducing app crashes by **25%**.

## Personal Projects

---

### University of Houston Web Portal — Demo

**2022**

- Collaborated with a team of 3 to replicate the University of Houston student portal using C++ and Qt, following the full Software Development Life Cycle.
- Built the admin module with user authentication, account creation, and secure management of student records, class assignments, and role-based portal access.

## Education

---

### University of Houston – Downtown

**Houston, TX**

*B.S. in Computer Science*

*2017 – 2022*
